- Registered businesses in Singapore, Switzerland, Indonesia
- Everyone can be a Winner: Intrapreneurship and High Employee Rewards

- Oracle Solution Provider for EMEA
- Oracle Alliance Partner for APAC
- Celigo Global Partner

What we do differently

- Raised and seasoned in the Cloud:
 - Our benchmarks are not legacy ERP systems, but modern B2C tools everybody likes to use.
 - Consultants with past work experience in Operations (no graduate consultants)
- Professional Mindset & Approach:
 - Clear Project Methodology
 - Dev Quality Management (Git, IDE, Multistage Dev Framework)
 - Own Environments & KB
 - Resource Backups & Minimum Downtime Measures
- Deep understanding of underlying Technology and priorities.

We bring our own tools—and they are top-notch.

Your System is a competitive edge, or a work horse at least, not a playtoy.

Stacking SuiteFlows and running client-side is poison to system performance.

We're more concerned about Auth & governance than IoT and AI right now.

Our view on native Cloud SaaS ERP

We chose NetSuite ERP as our primary platform as it fulfils our expectations for a real Cloud SaaS solution.

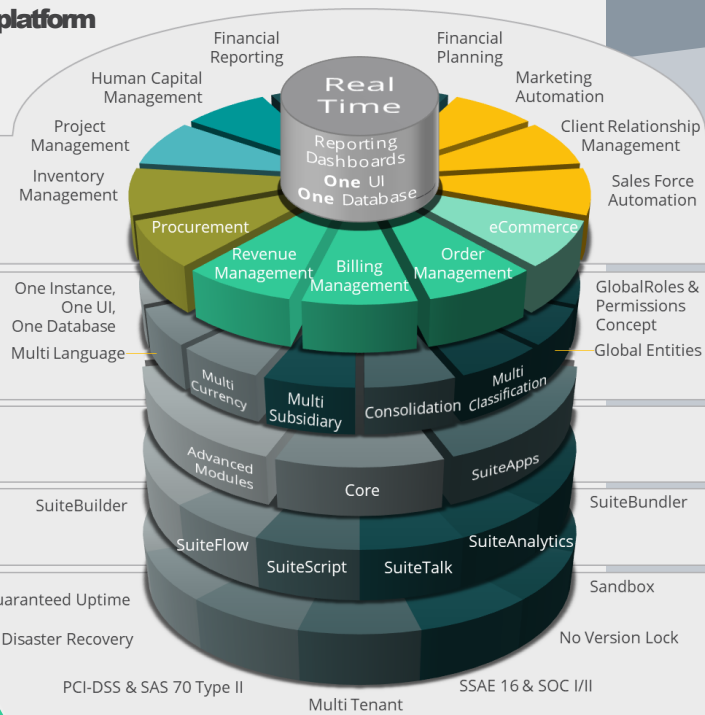

Beyond Financial Accounting, everything fed to One GL

Built for Enterprise & Global Customers

Rich Application Functionality Cloud Ecosphere for what's missing

Built on a Platform available to all Customers

Pure Cloud SaaS Infrastructure in all Regions of the World with Enterprise Grade

UX

Strategic Design

Planning & Execution

Methodology & Documentation

Performance & Governance

Principles in our Quality Management

- | | |
|-------------------------------------|---|
| Performance & Governance | If it's slow or unsafe, no one can use it. |
| Method & Documentation | Makes your Support quick and easy. |
| Planning & Execution | You want a Budget & Timeline. |
| Strategic Design | We have experience and think ahead. |
| UX | If users don't like it, they won't use it. |
